Computer Science student specializing in full stack development and cybersecurity automation. Skilled in C/C++, Python, TypeScript, and cloud technologies, with internship experience in AI-driven data analysis and secure workflow optimization.

PROFESSIONAL
EXPERIENCE

Full Stack Development Intern | April 2025 - August 2025

CyberPeace Institute – Geneva, Switzerland

- Refactored and debugged a Python-based incident analysis platform (Sirocco), reducing code complexity by 40% and restoring reliability for analysts
- Implemented AI model integration (OpenAI GPT, Mistral AI) and bulk ingestion scripts
- Designed a real-time TypeScript front end and automated BigQuery validation scripts, enhancing analyst experience and eliminating repetitive manual workflows

Administrative intern | July 2023 – Dec 2023

University of Geneva – Geneva, Switzerland

- Collaborated with cross-functional teams to optimize digital workflows and improve overall user experience across administrative services
- Developed documentation, training materials, and actionable proposals based on user feedback to support adoption of new tools and processes
- Contributed to automation initiatives by scripting repetitive tasks, reducing manual workload and improving operational efficiency

EDUCATION

Epitech | Oct 2022 – Jun 2025

Bachelor of software engineering

Berlin, Barcelona, Paris

Epitech | Sep 2025 – Jun 2027

Master of software engineering

Paris, Cardiff

Exchange Year at Cardiff Metropolitan University | Sep 2025 – Jun 2026

Bachelor of software engineering

Cardiff

STRENGTHS &
EXPERTISE

Scripting & Automation

Bash (10+ projects)

Programming

Python (20+ projects)

C++ (10+ projects)

Web (20+ projects)

Java (3 Projects)

Databases

MySQL

PostgreSQL

Languages

French (Native)

English (Native)

Spanish (A2)
